### ABOUT

Before I started down the path to software development, I was working in the restaurant industry as an operations director. I enjoyed the day to day contact with the guests and my team, plus I had an opportunity at any moment to make a difference in someone else's life. The restaurant industry allowed me to solve a myriad of problems while working in a fast-paced, team environment. I had always been interested in technology and what made it work, but it wasn't until my family afforded me the opportunity to chase the dream of web development. I knew I would be able to use the skills I had to have an amazing career without the physical toll the restaurant industry put on me. I look forward to growing and learning everyday in the development world!

### PERSONAL PROJECTS

#### Finish Finder

Finish Finder is an app built for interior designers to allow them to create finish boards for use in design projects without having to scour the web to find the materials they need.

Created with **React, JavaScript, HTML, and CSS**. [View Code](#)

#### HealthNut

HealthNut is a **Full Stack** application built with **React** for the client side and **ASP.NET Core Web API** for the server side that lets a user track their weight goals. This was my final capstone project that cements everything learned at Nashville Software School.

Created with **React, JavaScript, HTML, C#, ASP.NET Core Web API**, and styled with **Reactstrap**. [View Code](#)

### EDUCATION

#### Nashville Software School

Software Development Bootcamp - Certificate

### TECHNICAL SKILLS

- HTML
- CSS
- Javascript
- React
- JSON Server
- C#
- .NET
- MVC
- SQL

### TECHNICAL EXPERIENCE

#### NASHVILLE SOFTWARE SCHOOL

*Software Developer February 2021- August 2021*

NSS is a six-month intensive, full-time software development bootcamp focusing on HTML, CSS, Javascript, and React and server-side fundamentals with C# and .NET.

- Single-page application development with React and with a focus on modern ES6+ Javascript features and modular code
- Project management with issue tickets and GitHub Projects
- Database planning by building entity relationship diagrams (ERD) to define relationships with an emphasis on maintaining a flat data structure
- Utilized vanilla JavaScript (ES6), and React.js to create a single page dynamic web application using full CRUD functionality
- Manually styled applications using primarily CSS
- Completed 6 group project sprints while fully remote, comfortable with Slack, Zoom, GitHub Projects, and wireframes for group communication and collaboration

### PROFESSIONAL EXPERIENCE

#### CHICK-FIL-A

*Operations Manager June 2020 - November 2020*

- Led day-to-day operations for the entire restaurant
- Created and maintained the schedule using HotSchedules for 120+ employees
- Lead the monthly inventory count using the company's Inform application

*Assistant General Manager October 2019 - June 2020*

- Supported General Manager in day-to-day operations of restaurant

*Area Systems Director April 2019 - October 2019*

- In charge of upkeep, troubleshooting, and setup of all technology in the two restaurants

*Supervisor January 2012 - April 2019*

- Led individual shifts at the restaurant, setting line ups, organizing break schedules, and handling of troublesome guests

*Catering Manager May 2011 - January 2012*
