ABOUT ME

I joined Nashville Software School after working in the automotive industry for a few years. I realized during my time there that I was looking for something more impactful. I took a jumpstart course taught by Nashville Software School in the summer of 2020 and really enjoyed myself so I decided to leave my full time job and take the opportunity to get my full stack certification.

Projects

Front End Projects
- **Final Project:**
https://github.com/cculkin8/cc-capstone
- **Kennels:**
https://github.com/cculkin8/kennels

Full Stack
- **TabloidFullStack:**

TECHNICAL EXPERIENCE

NASHVILLE SOFTWARE SCHOOL
NSS is a 6 month intensive, full stack software development bootcamp with a focus in:
- Front-end development with HTML, CSS, Javascript and React Framework
- Server-side development with C# language and .NET stack
- Team and individual learning with capstones for both front and backend

PROFESSIONAL EXPERIENCE

2020 Account Manager
Citrin Holdings LLC
- During my time as the Account Manager for Access by BMW I moved more of my focus towards the needs of my coworkers, staff, and the program as a whole than the immediate needs of our customers
- I was in charge of a fleet of over 100 vehicles that our customers had access to. This entailed keeping the vehicles clean, registered, and properly maintained
- I was also the main contact in Nashville for any of our team members in New Jersey and Atlanta when ground operations were involved

2019 Program Manager
Citrin Holdings LLC
- During this time I worked closely with BMW Financial Services to help deploy and run ground operations of the Access by BMW subscription program that was based in Nashville
- I assisted in a noticeable increase in customer satisfaction with a raise of NPS score from 83% to 96%
- As the main contact for all of our customers I created a strong personal connection with each of them to make sure they felt welcome to the program and all that was offered
- I went out of my way to listen to the suggestions my clients had for us and did my best to have them implemented into the program
