EDUCATION

Austin Peay State University
BS in Computer Science and Information Security
Double Major

CAREER SUMMARY

Software Developer
 SSE Inc| May 2019 to Dec 2020
- Worked on the P8 Poseidon program in radar and sensors simulations
- Extensive work in version control and customer specific repos

Tutor: Computer Science
Austin Peay State University | Sep 2018 - May 2019
- Tutored students in group sessions and 10 students in one-on-one training, in C++, Java, Security, and Database Management
- Worked at satellite location with limited supervision

Infantry Squad Leader
U.S. Army | Jan 2004 - Mar 2015
- Staff Sergeant responsible for training and proficiency of two four-man teams with increasing responsibility
- Responsible for equipment totaling over $1,000,000

TECHNICAL EXPERIENCE

Checkered Blast | Front End Capstone NSS
Link: JSchugt/checkered_blast (github.com)
Summary:
   Checkered Blast is an application used to help users store personal recipes create a meal with those recipes and create a meal plan with those recipes. Not only does it allow people to plan for the future but will help keep a history of meals that were created.
Goal:
   Develop an app that solves a problem of making meals but not writing down recipes or losing a particular recipe in history of a browser, while learning more about React, Javascript, CSS, and HTML.

Nutshell | Front End Group Project NSS
Link: Nutshell
Summary:
   Nutshell is a single Page application bringing together the React, APIs using JSON, HTML, CSS and Javascript learned. Creating an application that allowed user to post articles, check weather, plan events and message other users. As part of a 4 person scrum, planning the execution and requirements of the application, developing ERDs, using Git and version control to bring the project together.
Goal:
   Nutshell built upon Agile ideologies, setting sprint goals, Having Stand ups and communicating with the customer to achieve the best product possible.

NSS Boot Camp:
Feb 2021 - Aug 2021
   NSS is a six-month intensive, full-time software development bootcamp focusing on HTML, CSS, Javascript, React and server-side fundamentals with C# and ASP.NET.
   Single-page application development with React and with a focus on modern ES6+ Javascript
   features and modular code
   Project management with issue tickets and GitHub Projects
   Database planning by building entity relationship diagrams (ERD) to define relationships with an
   emphasis on maintaining a flat data structure
   Utilized vanilla JavaScript (ES6), and React.js to create single page dynamic web applications using full CRUD functionality
   Completed 6 group project sprints while fully remote, comfortable with Slack, Zoom, GitHub
