ABOUT

Growing up as a musician, I was always a bit of a nerd. As I got older I became fascinated with how technology was changing the world around me. This eventually lead to me tinkering with everything I could get my hands on, from creating a simple MySpace page to writing my own Skyrim mods. It eventually became obvious to me, considering I was doing it for fun anyways, that I could make a career out of this. After working unfulfilling jobs for most of my life, I'm thrilled to have the opportunity to start a new career doing something I truly love.
