SKILLS

- Software Applications
- Database Programming
- Web-Based Software Engineering

PROJECTS

- Treasure Chest
  - Website build for used PC parts in which users can buy and sell their parts on this single-page app.
  - This full-stack CRUD app implements technologies C#, React, SQL, and Reactstrap.
  - https://github.com/cbjones93/TreasureChest
- BreweryFinder
  - Single page app using React.js. Full CRUD functionality. BreweryFinder allows users to filter through a large database of breweries and make new connections to other craft brewery enthusiasts.
  - This project implements also Javascript, JSON, CSS, and HTML.
  - https://github.com/cbjones93/BreweryFinder
